ULTRA WHITE EXTERIOR MDF

The Premium, Durable MDF Panel for Demanding Conditions.

Ultra HMR (Ultra High Moisture Resistant) MDF substrate panel is manufactured using I-BOND® MDI resin by Huntsman with no added Formaldehyde (NAF) and developed specifically for use in areas where moisture may be present.

The specially formulated MDI resin used in the production increases the physical properties and durability of the MDF and increases protection against thickness swell, creating a premium panel for demanding conditions.

SPECIFICATIONS (mm)

Sheet Size: 2420 x 1215

Thickness: 16mm

Finish: Satin, White

Our White Satin on Exterior MDF, as with all wood products in exterior applications, must be coated on all surfaces and edges with an exterior based system to control both moisture uptake and moisture loss. Ultra White Exterior MDF is designed for use in areas that are protected from direct exposure to the weather.

APPLICATIONS

- Outdoor Decorative Panels (Alfresco Kitchens)
- Indoor Wet Areas (Laundries, Bathrooms)
- Window Reveals
- Exterior Door Skins
- Other Custom Applications
